

PROFESSIONAL SUMMARY

Electrical Engineer with hands-on experience in utility-scale Solar PV project execution, including electrical construction, site engineering, pre-commissioning, testing, inspection, and energization support on the Obelisk Solar PV Project – Scatec.

Experienced in electrical drawing and SLD review, PV strings, combiner boxes, DC collection systems, inverter stations, electrical testing, punch-list closure, quality inspection, and technical documentation. **Strong background in** LV/MV/HV systems, transformers, switchgear, power distribution, UPS, batteries, backup generators, electrical maintenance, contractor coordination, and site troubleshooting.

PROFESSIONAL EXPERIENCE

SAMCRETE ENGINEERS & CONTRACTORS

Site Engineer – Electrical / Solar PV

Obelisk Solar PV Project – Scatec | Feb 2026 – Jul 2026

- **Executed electrical activities during** construction, pre-commissioning, testing, and energization of a utility-scale Solar PV project.
- **Inspected** PV strings, combiner boxes, DC collection systems, and inverter stations **against approved drawings, SLDs, and specifications.**
- **Reviewed installations, identified deviations, and supported** punch-list closure and corrective actions.
- **Performed** voltage, polarity, continuity, and insulation resistance (IR) testing using Megger devices.
- **Supported commissioning activities,** pre-energization inspections, technical queries, and site observations.
- **Coordinated with Construction and Commissioning teams and maintained** inspection and testing documentation.

QENA GOVERNORATE – EGYPT

- **Technical Infrastructure & Electrical Systems Manager | Feb 2024 – Present**
- **Manage** UPS systems, backup generators, batteries, power distribution, and electrical infrastructure.
- **Oversee preventive/corrective maintenance, troubleshooting, equipment performance, and technical issue resolution.**
- **Coordinate** electrical installation, testing, infrastructure upgrades, contractors, inspections, and handover.
- **Maintain technical records, inspection reports, equipment status, and corrective actions.**

GPR Radar Technician & Data Analyst – Additional Assignment | Apr 2024 – Dec 2024

- Operated GPR systems for **underground utility detection and infrastructure investigations.**
- Supported utility mapping, field inspections, data analysis, and technical reporting.

SITE ELECTRICAL ENGINEER – Huawei & Ericsson Projects

Nov 2023 – Jan 2024

- **Performed installation, inspection, troubleshooting, and maintenance of** site electrical and power systems.
- **Worked with** batteries, rectifiers, DC power systems, power distribution equipment, and electrical connections.

- Conducted equipment testing, site inspections, and site readiness activities.

ARMED FORCES DOCUMENTATION CENTER

- **Electrical & Technical Department Officer / Department Manager | May 2021 – Oct 2023**
 - **Managed daily** electrical, technical, and maintenance operations.
 - **Maintained** UPS systems, batteries, power supply, electrical/electronic equipment, and power distribution systems.
 - **Diagnosed electrical faults and coordinated** maintenance, testing, troubleshooting, and equipment replacement.
 - **Supervised technical personnel and maintained maintenance and inspection documentation**
-

TECHNICAL SKILLS

UTILITY-SCALE SOLAR PV: Utility-Scale PV • PV Array & String Configuration • PV Modules • Combiner Boxes • Inverters • DC Collection Systems • Pre-Commissioning • Pre-Energization • Energization Support • PVsyst

ELECTRICAL ENGINEERING: LV/MV/HV Systems • Power Transformers • Switchgear • Circuit Breakers • CT/VT • Cables • Protection Fundamentals • Substations • Transmission & Distribution • SLDs • Earthing & Grounding

PROJECT / SITE ENGINEERING: Construction Monitoring • Design & SLD Review • Electrical Inspection • Technical Queries • Punch-List Closure • Quality Verification • Contractor Coordination • Technical Documentation

TESTING & COMMISSIONING: Voltage & Polarity • Continuity • Insulation Resistance • Megger Testing • Electrical Testing • Pre-Commissioning • Commissioning Documentation

POWER INFRASTRUCTURE: UPS • Battery Systems • Backup Generators • Power Distribution • Preventive & Corrective Maintenance

SOFTWARE: AutoCAD • PVsyst • Microsoft Excel • Microsoft Office

EDUCATION

Bachelor of Communications & Electronics Engineering

Higher Institute of Engineering – Luxor, Egypt | 2015 – 2020

Postgraduate Studies – Antennas Engineering

Aswan University | 2022 – 2023

CERTIFICATIONS & TRAINING

Solar Energy (PV Systems) – ITI • PVsyst Training • Project Management – Portolearn / MCIT • PMP Exam Preparation • CCNA • Microwave & Optical Fiber Transmission – NTI • IoT Application Development – ITI

LANGUAGES

Arabic: Native | **English:** Very Good
